

# AMCS Route Planner

Lower your fuel costs, simplify complex logistics, and boost productivity with our top-tier route planning software

Learn how AMCS increases your efficiency and Performance Sustainability

**Book a call with our experts for a personalized consultation** 

## Overview

AMCS Route Planner is designed for advanced route optimization and covers the entire planning process for today's waste management companies.

This sophisticated IT system, combined with a user-friendly interface, improves your distribution of operations and integration capabilities. Get seamless connection with any ERP or CRM system through web services, XML, databases, or CSV files.

“

**Without the automated system handling our complex scheduling, we would probably need three times as many planners.”**

Kenneth Jespersen,  
Transport Manager, REMA

## Key features

With AMCS Route Planner, you can:

- Perform daily route optimization with newly-generated order pools
- Conduct periodic master route optimization to accommodate seasonal changes
- Easily integrate new customers into existing master plans
- Optimize order pricing and time-slotting during the order-taking process, and use sequence optimization and geocoding capabilities, after integrating with AMCS Enterprise Management software
- Manage high data volumes effectively for high-density planning
- Plan based on fixed visit patterns and modify schedules across different days, allowing flexibility

## Major benefits

up to

**25%**

reduction in the number of vehicles or driver shifts, or both

up to

**30%**

decrease in miles driven, driving time, and CO2 emissions

up to

**90%**

reduction in time spent on route optimization
