Overview

Metal recyclers are facing a growing number of market forces impacting their business including:

- Market price and cost volatility
- Demand for higher quality output
- Increased regulation and compliance
- Increased focus on the transition to a circular economy

This new era of scrap recycling demands greater business agility, process automation, cost control, collaboration across partners, and greater data insights to manage all these conditions.

The AMCS Platform for Metal is designed specifically to automate the end-to-end processes of the metal recycling industry from scale to sale. It's an invaluable tool for helping businesses move toward Performance Sustainability – the pragmatic approach that prioritizes people and the planet, while keeping profitability and compliance front and center.

The AMCS platform leverages the most innovative and modern SaaS Cloud technology, and the latest mobile, analytics, and portal solutions to provide you with a future-proof solution to grow your business.

Key Benefits

- Buy smarter with inbuilt grading evaluation of all feedstocks with automation of billing adjustments
- Gain real-time views of your inventory and costs for smarter buy and sell decisions
- Gain deeper insights with our suite of 100+ reports and our intuitive KPI dashboards

Leverage Latest Technologies

- Superior user experience and mobile-friendly design make the solution easy to use, which drives productivity and ROI
- Connect and collaborate with key customers, suppliers, and portals to provide them with self-service tools via our range of digital portals
- Future-proof product roadmap delivering continuous business innovation
- Best-in-class saas enterprise level, best-in-class security, agility, performance, and availability

Maximize Operational Efficiency

- Automate and connect all your critical recycling processes on a single platform
- Gain full visibility across all key operational and financial data, such as inventory and costs
- Evaluate and grade all your purchased feedstock to protect your margins
- Automate your dispatch to maximize utilization of your trucks and containers
- Plan production operations - such as shredding - to manage costs, productivity, and output
- Maximize automation of contract and price management to reduce administration workload and costly errors

Grow With Confidence

- Leverage our SaaS platform (powered by Microsoft Azure) to benefit from best-in-class performance, scalability, security, and availability
- Profit from our product roadmap that delivers continuous business innovation
- Utilize our extensive automation and digitalization to grow your business without increasing operational costs
- Capitalize on our enterprise-grade solution to operate across multiple locations, companies, currencies, and languages
- Digitize core processes to enable your employees to focus on the most important business activities, so they can work smarter and drive growth opportunities
- Minimize environmental impact, while maintaining profitability
