## Overview

Navigating unpredictable market rates, export documentation, and sustainability challenges, recycling management companies face a tough terrain. The AMCS Platform offers end-to-end automation and visibility, enhancing efficiency and adapting to evolving customer needs for sustained profitability.

Consider just some of the challenges faced in the recycling management industry: Material grading. High processing costs. Inventory management. Contamination. And that's just the tip of the proverbial iceberg. AMCS Platform integrates industry-specific software that enables you to see deep into your operations - in real-time - to make better-informed decisions that address those challenges.

The solution delivers significant waste management controls, transport planning, fleet management, driver interaction, and so much more. AMCS Platform's functionality automates and optimizes your end-to-end processes, from inbound material grading to cross-border exports.

## Key highlights

AMCS Platform is designed to allow recycling companies to operate smarter and more seamlessly, boosting efficiencies while simultaneously increasing sustainability and maintaining profitability.

- **Sales sourcing:** Inbuilt customer quotation and approval process
- **Customer and supplier contracts:** Support complex and outbound contracts, billing and payment rules
- **Advanced pricing engine:** Pricing options to accommodate the variable nature of pricing. Fix or base contract prices for purchase and sale of materials on market rates
- **Transport and subcontractors:** Manage collections and deliveries end-to-end and/or use a comprehensive set of subcontractor features
- **Inbound, grading and receiving:** Built-in workflows receive planned activity while enforcing financial and quality validations
- **Outbound:** Workflows manage production, material sales and transfers for non-recyclable waste
- **Brokerage:** Dedicated sector for the management of brokerage transactions
- **Export management:** Manage all aspects of export orders, from material sourcing to export documentation
- **Finance:** A comprehensive set of AR & AP functionality that ties in directly to contracting and execution workflows

## Major Benefits

AMCS is a trusted partner of leading recycling companies and uses innovation to provide an exceptional user experience with AMCS Platform.

- Improve overall efficiency by streamlining operations with complete enterprise-wide visibility
- Increase ROI from each asset through efficient tracking and weighing technology
- Cut day-to-day operational costs, including fuel, mileage and resource overtime. Reduce your reliance on paperwork and multiple legacy systems
- Effectively manage and automate your subcontractors through AMCS Subcontractor Portal
- Enhance productivity with container scheduling and turns, route optimization and driver scheduling
- Increase employee accountability, reducing the risk of load skimming and theft
- Improve customer service through self-service options, automated workflows, real-time reporting, and quicker payments
