

AMCS Platform for Municipalities

Smarter operations for modern municipalities

Automate, optimize, and
connect municipal services.

Boost efficiency. Maximize performance.
Deliver more. ➤

Improve productivity, service reliability, and community outcomes

AMCS Platform for Municipalities is built for the demands of modern municipal operations. From waste and recycling to street cleansing, winter maintenance, and public area maintenance, it provides a single solution to plan, manage, and optimize services in the office, at the depot, and in the field.

By digitizing paper processes and automating workflows, it helps boost crew and fleet productivity, reduces missed collections, and delivers higher service levels to residents. Configurable and scalable, AMCS Platform for Municipalities adapts to each city's needs while providing the visibility and control to improve efficiency, sustainability, and safety.

Trusted by leading service providers worldwide, it's proven to modernize municipal services and deliver measurable results.

Why choose AMCS Platform for Municipalities?

Drive efficiency, deliver savings

Automate manual tasks, digitize workflows, and optimize fleet and crew deployment across every service. Reduce costly service errors, free up time previously lost to paper processes, and keep daily operations running smoothly, even with complex schedules or limited resources.

Deliver higher level of service

Meet rising service expectations and stay ahead of SLAs. With instant access to accurate job details, crews complete tasks on time, reduce missed pick-ups, and keep services running reliably – supporting cleaner communities and safer operations in the process.

Drive performance, advance sustainability

Use smarter routing and operational efficiency to improve recycling performance, cut emissions, and support circular economy practices. Data-driven insights and service-level tracking make it easy to report accurately, meet targets, and scale sustainability programs.

Enhance safety, every day

Integrate advanced safety tools – from onboard cameras to AI-powered contamination, overfill detection, and safety focused route optimization – to strengthen accountability, reduce risk, and protect both crews and communities.

Build trust through transparency

Gain a clear, connected view of operations to enhance visibility and accountability. Demonstrate responsible public resource management while consistently delivering reliable, high-quality services. With over 25 million services delivered every week, AMCS Platform for Municipalities is trusted worldwide to support safer, cleaner, and more efficient operations.

How AMCS Platform for Municipalities powers your performance

Configured to your operation

Every municipality has its own priorities, processes, and challenges. AMCS Platform for Municipalities is configurable to match the way you work, defining services, tasks, inspections, and event handling to reflect local needs. This flexibility keeps operations compliant, responsive, and consistent, even as requirements evolve.

Built for every municipal service

From waste and recycling collection, street cleansing, winter maintenance, and public area maintenance, AMCS Platform for Municipalities supports the full scope of municipal and environmental services in a single connected system. Plan, allocate, monitor, and optimize daily operations with the same level of control and visibility across every service.

Total visibility, anywhere

Whether in the office, at the depot, or in the field, AMCS Platform for Municipalities delivers the right information to the right people, exactly when it's needed. Crews can log progress, flag missed collections for rescheduling, and report issues such as blocked access points or safety risks. This information feeds directly into the system, enabling teams to respond quickly, adjust schedules, and keep services running smoothly.

Better data, stronger operations

AMCS Platform for Municipalities integrates seamlessly with the systems that keep operations moving - from IoT-enabled bins and vehicle telematics to CRM, 311, and asset management tools. By connecting people, fleets, and assets into a single solution, it creates richer, higher-quality data. With stronger data and clearer visibility, operation teams can monitor performance, identify trends, and make informed decisions that improve efficiency, safety, and service delivery.

From insights to action

Efficient workflows and in-field reporting create a strong foundation, but AMCS Platform for Municipalities takes it further. Crews can capture data beyond their core tasks, recording damaged assets, graffiti, potholes, or other local infrastructure concerns. These insights feed straight into the system, enabling municipalities to act proactively, design targeted improvement programs, and deliver measurable results that benefit their communities.

Partnering with AMCS

With over 30 years in waste and recycling and 4,000+ customers worldwide, AMCS combines deep industry expertise with a commitment to innovation - investing over €40M annually in research and development.

AMCS Platform for Municipalities builds on this foundation to transform municipal operations. Designed for the unique demands and multi-service requirements of the municipal market, it brings together people, fleets, and systems in a single solution - delivering safer, smarter, and more scalable operations.

“

We value the solution - especially the proximity alerts, GPS- and time-stamped photos, mobile devices for supervisors, and the ability to monitor and manage the contract in real time.”
